

ELEVATOR CONNECTIVITY, SIMPLIFIED.

Powered by  LIFTCOM

Smarter Elevators. Stronger Connectivity.

Alliance Elevator Solutions integrates LiftCom™ technology into every new construction elevator package, delivering continuous monitoring and real-time connectivity that keeps you informed from day one.

LiftCom transforms elevators into securely connected, intelligently driven systems by uniting cellular emergency communications with cloud-powered monitoring and reporting. This built-in connectivity provides building owners, property managers, and their trusted elevator service professionals with real-time insight into elevator health and performance, enabling faster issue resolution, lower maintenance costs, and improved tenant safety.

That's ELEVATOR CONNECTIVITY, SIMPLIFIED.

ELEVATORS, SIMPLIFIED.

LiftCom Core: Technology that Works for Your Building

Core benefits that come standard with LiftCom integration through Alliance.

Detailed Performance Reports

Monthly analytics provide clear visibility into elevator health, helping you better understand system performance and plan future upgrades more effectively.

Proactive Maintenance & Alerts

Smart notifications flag out-of-tolerance operation and potential issues before they lead to breakdowns.

Predictable Monthly Rate

A simple subscription model covers connectivity, monitoring, and updates, helping owners plan budgets with confidence.

Minimal Disruption Installation

LiftCom can be installed and activated in under an hour, keeping tenant impact near zero.

Extended 3-Year Warranty

Alliance extends the standard 1-year warranty to 3 years on ADVANTAGE_{SL}TM (coming soon) and EDGE_{SL}TM new construction elevator packages with an active LiftCom subscription.

LiftCom Pro: Enhanced Monitoring and Communication

LiftCom Pro expands on the Core foundation with enhanced monitoring, communication, and compliance capabilities designed to support more demanding building performance and safety.

Cellular Gateway

Provides reliable, code-compliant emergency communication by replacing outdated phone lines with secure cellular connectivity that maintains communication during outages.

24/7 Monitoring

Continuously monitors elevator health and identifies early warning signs before they lead to costly downtime.

Code Compliance

Supports NFPA and ASME safety and communication code requirements, helping ensure your elevators meet regulatory standards.

Enhanced Performance Reports

Enhanced monthly analytics provide deeper insight into elevator health, helping you better understand system performance and identify opportunities for improvement.

LiftCom Premier: Complete Visibility and Control

LiftCom Premier builds on LiftCom Pro with advanced performance visibility, reporting, and communication capabilities, delivering a fully connected elevator solution.

Performance Insights

Cloud-based access provides real-time visibility into elevator uptime, trips, and faults from anywhere.

Professional Reports

Delivers clear, easy-to-share reports that provide stakeholders with insight into elevator performance.

Dual Cellular Gateways

Redundant cellular gateways support both video and text communication, helping ensure continuous, reliable communication and enhanced passenger safety.

Performance Benchmarking

Advanced benchmarking and quarterly insights provide a deeper understanding of system performance and long-term trends to support better planning and decision-making.
